

1 Minute Video Showing How To Make 1 Minute Wine

Categories : [DIY](#), [General](#)

We have posted about [1 minute wine](#) before and this video is actually by the same guys from 'Five Gallon Ideas', they have just created a 1 minute (1.27 minute really) video showing how to make the 1 minute wine. As said in my original post - If you are really cutting costs, a balloon can be fixed to the top of the bottle and used as an airlock, just be sure to prick it with a needle to let the gas out.

We have made hard cider in exactly the same way, although there was no need to add extra sugar. These turned out really well as long as you left it for a couple of weeks to mature and mellow.
