10 Things To Try, To Remove Stuck, Seized & Stripped Nuts & Bolts

Categories: DIY, General

We've all been there... The screw head snaps off because we screwed it in too hard. The bolt head came off because the bold was seized tight. The nut stripped the thread because we didn't know the saying - lefty loosey, righty tighty! Anyone who has done any DIY or mechanics has been there and shouted and swore when it happened.

The good news is, if it does ever happen again, if you check out the post below, you will know 10 things you can try to remedy the situation. As the saying goes - 'there's more than one way to skin a cat'. Check out the post below and you'll know what to do next time it happens.

10 Things To Try, To Remove Stuck, Seized & Stripped Nuts & Bolts
