12 Practical Survival Uses For Duct Tape

Categories: General Prepping, Tools & Gear
1. Use with a dressing to bandage and protect wounds.

2. Fix a leaky roof or repair a tear in a tent or tarp.

3. Make strong cordage (twist duct tape to make a cord or rope).

4. Repair clothing, sleeping bags and packs.

5. Repair or improvise some shoes.

6. Make a drinking cup (with a bit of folding you can make a cup to drink from).

7. Repair a cracked water bottle, or a punctured hydration bladder.

8. Make a survival arrow fletching.

9. Seal around windows and doors and tape windows for high wind storms like hurricanes.

10. Make emergency repairs to your vehicle.

11. Make a splint or brace for injured limbs.

12. Waterproof and insulate shoes and boots.
If you don't have any duct tape, get some! Seriously, it is crazy you don't have any... There is a use for duct tape in almost any situation you can think of, everything from around the home, DIY through to medical and survival uses. Don't leave home with out it!

Quick tip - if you want to carry duct tape with you in your hiking/camping or bug-out bag, don't take the whole bulky roll; instead carefully wrap your water bottle in duct tape. This will protect your water bottle from bumps and allow you to carry some duct tape without any effort or too much additional weight.
