All bugs and insects have their place, they are all an important part of the ecosystem. The problem is that some of these bugs can be annoying, unhygienic and in some cases, dangerous, and when their place and our place cross, we can have problems... Most folks reach for nasty insecticides, which are bad for us and the environment. Next time you find yourself reaching for the bug spray, why not consider trying some of the natural alternatives below?

There are pest control methods for - Ants, Mosquitoes, Flies and Spiders...

31 Natural Pest Control Methods & Recipes
