8 Water Sources And How To Treat Them

Categories: General Prepping, Self-Sufficiency, Water

Water is obviously essential for survival, emergency or not! The rule of 3 - 3 minutes with no air, 3 days with no water and 3 weeks with no food.

one would think that WATER is a top priority for most preppers. The problem is, it often is not. It is often overlooked because we all have such ready access to it nearly everywhere we go. It comes out of our faucet, we can buy it in stores, it’s in lakes, rivers and streams, and it rains… I found a great article that gives you great locations you may find water in a SHTF situation and also ways to treat the water so its safe to drink.

8 Water Sources And How To Treat Them
