Set Up A Very Simple Laundry Greywater System

Categories: Homesteading, Self-Sufficiency

If you live in a hot region or you are dealing with water restrictions, it can make it very difficult to water your fruit, vegetables, flowers and plants. What a lot of people don't realize is that with a few precautions, such as using biodegradable detergents, you can recycle your laundry and bath/shower water to use to water your garden. This water is known as greywater. If you want to know more about safely using greywater click here.

There are professional/more permanent systems that can be installed to utilize your greywater, but if you check out the link below, there is a tutorial on how to set up a super simple laundry greywater system. It is not pretty but it works as a short-term solution until you set up something more permanent.
