

All Natural Tick Repellent for Dogs & Humans:101

Categories : [General Prepping](#), [Health/Fitness](#), [Wilderness Survival](#)

With summer just around the corner its time to tick & bug proof you and your dog prior to those fun filled hikes, outdoor excursions & camping trips. Ticks can cause lots of issues for your pet and even yourself. The commercial tick spray and repellent has harsh chemicals which personally I do not want to use.

Luckily I found a really great article with a natural tick recipe to take the bite out of the dog days of summer. This is safe, non-toxic and has no adverse side effects.

This is a subject close to my heart as my wife had lyme disease from a tick bite, whilst pregnant with my son.
