Amazing Mobile Hot Tub Tiny House - You've Got To See This!

Categories : General

This is one of the coolest things I have ever seen, a tiny house with a hot tub, built on a trailer for easy transportation. It's also absolutely stunning inside and out.

This tiny house is owned by Tinywood Homes, and if you live in the UK (or you are visiting), you can actually stay in this awesome little house, as it is one of several tiny wood built houses they have for holiday rental. Even if you are not going to stay there, I highly recommend checking out the additional photos of this and the other awesome tiny houses they have for rental.
