

## Awesome Auto-Filling Water Bowl For Dogs & Cats

Categories : [DIY](#), [General](#), [Homesteading](#)

We actually purchased an auto-filling bowl for our cat, which was very similar to this. Funny, it never occurred to me just how easy it would be to make one myself.

Anyway if there is anyone else out there who wants to make sure the water bowl stays topped up during the hot weather etc, save yourself \$30 a make one of these dog/cat water bowls yourself.

To my mind the one in the photo looks more suitable for a cat, but that's the beauty of DIY - you can make things to your own specification.
