Awesome Campfire Swings (Includes Build Photos & Materials List)

Categories: DIY, General

Firstly, before we get onto anything to do with building the campfire swing set-up, I have to say, this is beautiful and awesome in equal measures. It must be great, sitting out there together with friends, with the fire roaring and a cold beer in the hand.

Now I have finished drooling, let's get on to building... Whilst this set-up looks amazing, it is actually surprisingly simple and straightforward to build and it should last for years. There isn't a full build tutorial, but there are build photos and materials list, so it shouldn't be too hard to fill in the blanks.
