Build A DIY Cob (Clay) Oven For $20

This is not the first time we have posted about building an outdoor DIY Cob/Clay oven (sometimes also know as a pizza oven). See last year's post: How To Build A Clay Oven for a different build tutorial.

I actually prefer this DIY build tutorial from 'Home Grown And Healthy'. It is a lovely and personal post, with great photos that takes you step by step though the entire build precess. If you can build your own cob oven for $20 and it looks like this one, surely it is a no-brainer? You get a beautiful garden feature which is also a functional and practical oven. Check it out below!
