

## Build A DIY Mailbox Woodstove

Categories : [Homesteading](#)

You only have to look at this and you're thinking yes, yes, yes... What a superb idea for use at home or at a camp-site.

These old mailboxes can be picked up for next to nothing and this project requires minimal work to convert the mailbox into a small wood burning stove that you can easily cook on. Handy to have at home in case of power cuts etc.

For more details on how to make this mailbox stove and details on a propane tank and ammo box stoves, head over to [Tiny House Listings](#).
