

## Build Your Own Triple Bunk Bed (FREE Plans)

Categories : [Homesteading](#)

How cool is that! This is an AWESOME idea, it is so amazingly simple to build, Ikea would be proud of it! But this tripe bunk bed from 'Kids Activity Blog' is so much better and cooler than anything Ikea sell...

The day you start having kids is the day you start running out of space, and it only gets worse, the older they get. We have obviously all seen traditional bunk beds, but I have never seen a triple bunk, let alone one that is cheap, easy to make, that has FREE plans so you can build one too.

I am blown away by how simple this is to make. I think anyone with some simple DIY skills and a few power tools could build this, no problem at all. Go on, reclaim some space from those kids!
