d.light S10 Solar LED Lantern

d.light S10 Solar LED Lantern 'in use'

The [d.light S10 Solar LED Lantern](#)

is a bright and durable replacement for battery-powered lanterns, candles, and kerosene lanterns. It is 3 to 5 times brighter than a kerosene lantern, and is built to survive tough conditions, including accidental drops, rain, and heat and dust.

Its integrated solar panel removes the need to carry and replace batteries or for electricity for recharging . Its 2 brightness settings offer up to 8 hours of bright light, it has dual solar and AC charging options which allows charging even during rainy or cloudy days, and its multiple-setting handle provides maximum flexibility for any use situation.

The [d.light S10 Solar LED Lantern](#)

has **180 Amazon reviews with a rating of 4.6 out of 5** and it is highly recommended for preppers, people who experience frequent power outages and campers.

In summary - it is tough, well made and provides around eight hours of light after a full days charging in the sunshine. **The most amazing thing about the d.light S10 Solar LED Lantern is the price. At the time of writing, [it costs just 15.95 on Amazon](#)**
