

DIY Drone Fitted With A Paintball Handgun (for legal reasons) – Remotely Shoots At Human Cardboard Cutouts

Categories : [Tools & Gear](#)

These guys purchased a low cost mail-order drone and adapted it by fitting a paintball handgun (for legal reasons) to test whether a novice user could fly the drone and fire upon and hit targets.

Watch the video for the AMZAING results.

You can purchase this very popular drone from Amazon for \$299

[Parrot AR.Drone 2.0 Quadricopter Controlled by iPhone and Android Devices](#)

I do not recommend you try to replicate the results in the video! *By all means, have fun with a drone, just don't strap a gun to it...*
