

## DIY Home Built Solar Power System

Categories : [DIY](#), [General Prepping](#), [Homesteading](#), [Self-Sufficiency](#)

If you truly want to live off-the-grid or insulate yourself against rising energy prices, you have to embrace and utilize solar power (unless you have running water source, in which case you could utilize hydro power instead).

The problem is that getting a professional company to kit out and set up you up with a solar power system can be very expensive, but if you have sound DIY skills, with a bit of planning and research, you can set up your own DIY home solar power system. Check out the link below to see how this can be done.
