

DIY Solar USB Charger – Upcycle An Old Altoid Tin

Categories : [General Prepping](#), [Self-Sufficiency](#)

If you are a fan of DIY and LOVE solar powered stuff, this is your next project. This Altoid tin solar USB charger will power your iPod or phone where ever you are.

Why spend 50 bucks on one from online when you can make one for a lot cheaper and a lot cooler looking. You can pop the solar panel away and no one will ever know what is inside.
