DIY - Strong Trellis For Heavy Vegetables And Strong Winds

Categories: General Prepping, Growing your Own, Homesteading, Self-Sufficiency, Urban Survival

If you have been a gardener for years you may know that trellis can be flimsy, break or quite literally blow away. So if you are new or an avid gardener, I have found a great article showing
you how to make a strong trellis that can not only support the weight of heavy vegetables such as squash and melon.

Here is how to build a simple arched trellis that will be very strong as well as beautiful. You will leave this trellis in place all year around.
