

FREE DIY Pallet Wood Flooring

Categories : [DIY](#), [General](#), [Homesteading](#)

I have lost count of the amount of DIY posts we have done about using wooden pallets for various projects (Search: pallet on the K.W.N search facility), but for all the DIY pallet posts we have done it has honestly never occurred to me to use pallets for a real wood flooring...

Genuine hardwood flooring is very expensive and out of the reach of many of us, but everyone can get hold of free wooden pallets, sand them and treat them to make their own beautiful wooden flooring. My only concern would be for durability - pallets are usually made from softwood and I am not sure how much wear and tear a pallet floor would take, but once fitted and treated it might be absolutely fine, I guess it would depend on the room/environment the floor is fitted in. Check out the tutorial and additional photos below.
