

Free Outdoor Shower Plans

Categories : [DIY](#), [General](#)

Firstly I should say - this isn't just any old outdoor shower, this is possibly the most awesome outdoor shower you could build, and what's even more awesome is that below are the FREE plans which show you exactly how to build it.

Unfortunately in this case awesomeness costs money... The cost of materials for this outdoor shower is \$2500, this is mainly because it is built almost entirely from cedar, which isn't cheap. That said, if you have the budget to build this outdoor shower, a competent DIYer should be able follow the straightforward plans and complete the project in 2-3 weekends. Get the plans below, there are also other free and paid DIY plans, so check those out as well.
