

## Get-Home Bag: Why It's Different & What To Pack

Categories : [General Prepping](#), [Urban Survival](#)

Everyone knows what a [bug-out-bag](#) is, or at least everyone who visits our website and follows us on Facebook does. What's the biggest problem with a bug-out-bag? The biggest problem is that it is usually not there when you need it... Most people store their bug-out-bag at home within easy access for running out the door in an emergency, but what happens when the emergency occurs when you are not at home?

Well that's where the get-home bag comes in. The get-home bag is exactly as its name suggests; it is a bag full of gear to get you out of dodge and back home quickly and safely in an emergency. The get-home bag would usually be stored in your vehicle or perhaps at your place of work. Find out more about get-home bags and what to store in them, on the link below.
