Grow Your Own Antibacterial Bandages

Categories : DIY, General, General Prepping, Health/Fitness, Homesteading

Firstly the plant is Wooly Lamb's Ear, and yes it is easy to grow! Wooly Lamb's Ear has antibacterial, antiseptic, and anti-inflammatory properties and it is great at absorbing blood and helping blood clot. In fact Lamb's Ear has been used for 100s and 100s of years as a wound dressing, especially on the battle field, so it is a shame that this kind of natural first aid knowledge is dying out...

I was going to say that it's a great idea for preppers and homesteaders to grow Wooly Lamb's Ear in case the SHTF, but I actually think that it's a great idea for everyone to grow some as a natural alternative to store bought Band-Aids etc. Get some planted and you'll soon have all the natural Band-Aids you need!
