How To Bake & Roast In Clay Flower Pots

Categories: DIY, General Prepping

I initially thought this was a bit of a gimmick, but having watched the video above, I can see a real use for roasting/baking using clay flower pots. Firstly I imagine it will use way less gas/electricity/wood than heating a conventional oven. But the main benefit is it allows you to roast meats and bake breads etc, without the need for an oven...

As demonstrated in the video - you can easily use this method with a small gas camp stove. I can't see any reason why you couldn't also use it on wood burning camp stoves/rocket stoves, or even a campfire with some care. This then makes this method of cooking very useful for people without ovens at home, camping, emergency preparedness and backyard cooking/BBQs.
