

How To Build A Smokeless Campfire

Categories : [Creating Fire](#), [General](#), [Wilderness Survival](#)

Most experienced outdoors people probably already know most of this, but I am guessing that most of you are not experienced outdoors people. Instead you are probably like me and no matter what you seem to do with your campfire or firepit, and no matter what direction the wind is blowing, the smoke still seems to follow you around the fire getting in your eyes.

Watch the video about for some excellent advice on how to dramatically reduce the smoke produced by your campfire. Obviously a 100% smokeless fire is impossible as where there is fire, there has to be some smoke. That said, you can dramatically cut down on the amount of smoke given off by following these tips.
