

How To Build An AWESOME 80 Pound PVC Tube Longbow

Categories : [DIY](#), [General Prepping](#), [Hunting & Fishing](#), [Wilderness Survival](#)

So you want to get into archery but you have been put off by the cost of traditional long bows and archery equipment? How would you like to build a long bow on the cheap, which is easily powerful enough to hunt with? Check out the two videos about from the Backyard Bowyer and see how it's done... This guy is awesome and he shows just how cheap and easy it is to make a quality, powerful long bow, from PVC tube.

I will soon be doing a post on how to make and fletch your own arrows, which could also save you a heap of money...

Archery is a great recreational sport/hobby, and it can prove a vital survival skill if the SHTF or you need to hunt for food in the future.
