

How To Build The Ultimate Pimped-Out Debris Hut

Categories : [Wilderness Survival](#)

A debris hut is easy to construct and it can keep you warm and dry. For those reasons, if you go on a survival course, the debris hut will usually be the first type of shelter they will teach you how to make.

If you watch the video, you will see the basics of how to make a simple debris hut, BUT, this is not a simple debris hut... This is an ultimate pimped-out debris hut, complete with its own internal heating system. I'll say it again, this debris hut has its own internal heating system to keep you toasty warm! Check out the video to see how this is achieved.
