How To Disinfect Water With Household Bleach To Make It Safe For Drinking

Categories: Health/Fitness, Urban Survival

Everyone knows about the iodine drops you can get to disinfect water, but did you know if you are in a survival situation, you can also use standard household bleach?

You do have to make sure you have the right kind/strength bleach, and you have to know the correct bleach to water ratio so you don't poison yourself etc. Luckily the clever folks at Willow Haven Outdoor have written an excellent tutorial on how to disinfect water with bleach and make it safe for drinking. Check it out below and follow the instructions carefully!
