How To Grow 50-80 lbs Of Tomatoes Per Plant

Categories : DIY, Growing your Own, Homesteading

That's right - 50 - 80 pounds of tomatoes PER PLANT! That's amazing, you could grow a huge amount of tomatoes in a really small space. This is useful for everyone regardless of how much space they have for growing food, but it is especially useful for people with limited growing space. Watch the video above and see how it's done.
