How To Make A Better Solar Dehydrator

Categories : DIY, General Prepping, Homesteading, Self-Sufficiency

We did a post ages back about how to make a different solar dehydrator: How To Build A Solar Food Dehydrator, but that dehydrator was a completely different design...

Personally I think this solar dehydrator is a more effective design. The whole thing seems more effective and simple and this applies to how it’s built and how it functions. If I had to choose between the two solar dehydrator designs, I would choose to build this one. Check out the great photo tutorial (including materials list) from '10 Degrees Above' down below.
