How To Make A Bow Drill & Start A Fire (With Ray Mears)

Categories : Wilderness Survival

Not as well known in the US as he is in the UK and Europe, Ray Mears is a bushcraft expert with decades of experience, plus various books and TV shows to his name. He really knows his stuff!

Here Ray demonstrates how to make a bow drill and start fire. He shows how to choose the correct wood to use, how to build the bow drill and how to efficiently use it to start fire.

Why not go and choose some wood and practice this in the yard? It's very good for impressing the kids, and it's better to practice at home, rather than in a survival situation...
