How To Make A Homemade Fire Extinguisher

**This design is meant to be a fun experiment, or a back up plan to deal with small fires. You should always have an ABC fire extinguisher on hand, even if the chances of a fire breaking out are relatively low. Whenever faced with fire, contact emergency services immediately.**

This is a fun project for the whole family. It will teach that fire is dangerous and always needs to be respected and have a back up plan for the fire if it goes out of control. This DIY fire extinguisher uses items easily found around the house. This recipe even worked on grease and electrical fires.

See how to make and use this type of extinguisher below. Remember. Respect fire. It is dangerous.
