How To Make A Mosquito Trap That Catches 1000s

Categories: DIY, General

Sure, you can purchase ready made mosquito traps, but these are usually not that good at their job; they may take out a few of the little devils, but if you live in an area that is plagued by mosquitoes, these traps are not really going to make that much of a difference.

The video above shows how to make TWO DIY mosquito traps, one of which is even solar powered! These traps are so effective that they can catch 1000s of mosquitoes each night and actually make a dent in the immediate mosquito population... Alternatively you can try planting some of these plants to repel mosquitoes.
