How To Make An Ultra Compact PVC Compound Bow

Categories : DIY, General Prepping, Hunting & Fishing

We have done several posts about making DIY PVC bows, but this is the first DIY compound bow tutorial we have featured.

Not only is this a compound bow, but it is an ultra compact compound bow which also just happens to be very powerful! Check out the video about to see how it is made, the utilization of the toothbrush is genius! As always take care when making and using bows. They may be cheap and easy to make, but that doesn't make them any less dangerous...
