How To Make Beautiful DIY Luminaries

We have featured quite a few DIY craft/gift projects, but I think this DIY Luminaries project from 'Our Best Bits' is one of the best! These are actually really simple to make and they look amazing...

If that is not good enough, these are also super cheap to make too, as long as you have a printer, all you need is some vellum and some clear glasses or jars (and obviously a candle!). If you recycle some jars I think these should cost way less than a dollar to make, and that's awesome for such a beautiful, personalized homemade ornament/gift. Go on, light up your memories!
