How To Make Homemade Jam In The Microwave In 30 Minutes

Categories: Cooking, Homesteading, Recipes

If like us, you are drowning in strawberries, this is an awesome tip for making great tasting strawberry jam in the microwave in just 30 minutes. Depending on the size/power of your microwave, you can make up to three jars at a time.

Before you dismiss this as ‘can’t be as good as traditionally made jam’ - my wife entered a jar of microwave jam into a jam making contest a few years back and she won first prize!

To be honest, if I was making a huge batch of jam, I would still go down the traditional route, as it is probably quicker if you are doing a huge batch. That said, if you just want to do just a few jars of jam at a time, I seriously urge you to give this a try. You will be blown away by the results and you’ll probably never make jam the old way again!
