How To Make Rum (Full Tutorial)

Categories : DIY, General, Recipes

If there is one thing I know - a lot of you guys like your alcohol! What's more, lots of you like to make it cheaply yourselves... I am not going to go into whether it is legal or not, or whether you need a permit or not. We have visitors from all over the World, so it's up to you to find out these things.

So how do I know you guys like a drink or two? Well, three previous posts on the subject have been three of the all-time most popular posts on K.W.N: How To Make A Still With A Pressure Cooker, How to Make Moonshine – 101 and How To Make Apple Pie Moonshine. That is why I know this tutorial on how to make rum will be right up your street!

It's not just about bootleg alcohol, being able to distill and produce alcohol if the SHTF will become a very valuable skill to have. People are always going to be willing to pay for/barter for alcohol. Also remember - there are far more uses for distilled alcohol than just drinking it - fuel and medical disinfectant being two.
