How To Make Stinging Nettle Beer

Categories : Homesteading, Recipes, Self-Sufficiency

I saw how to do this and instantly wanted to try it for my self. I like the odd beer now and again, this would be good in an emergency situation to barter with or heighten moral. This beer can be ready in as little as 2 weeks.

Not only is this good for drinking but remember you could marinate meat with it, polish pots, wash your hair, and even loosen rusty old bolts. So this really is a versatile substance to make. Did you know beer can kill slugs? and can be used to catch mice? Now you do, so go make some nettle beer and enjoy.
