

Make A DIY Paracord Watch Strap

Categories : [General Prepping](#), [Wilderness Survival](#)

I have done several posts about the [uses of paracord](#) and paracord bracelets, such as the review of the excellent: [‘Wazoo Survival Gear’ Minimalist Survival Bracelet](#). You can of course make your own [paracord bracelet](#) but if you are not into wearing an additional bracelet, how about making a paracord watch strap instead? If you are anything like me, you're saying - why didn't I think of that... A paracord watch strap, it is so obvious.

Anyway if you think it's a good idea and you'd like to give it a go, head over to the Instructables website below and check out the detailed tutorial.

If you are going to bother making one, make sure you make it with [official 550 paracord, as used in the military](#)

. Don't use the cheaper stuff, get something you can rely on.
