Perfectly Frothy Hot Cocoa Recipe

Categories : Cooking

It is certainly hot cocoa weather, when it's cold outside I am definitely more of a cocoa over coffee guy... We made some of this the other day (although we left out the salt) and it was delicious, and I mean delicious!
Don't buy the ready made stuff, this is super quick and easy to make. Head over to Riddle Love and get the recipe and check out the tips for getting it extra frothy. Their recipe is for raw milk hot cocoa, where the milk isn't heated above 105 degrees to maintain the milk enzymes. If you are not concerned with the enzymes and like it hotter, go for your life! Also, you don't have to use raw milk, we didn't!
