Quick & Delicious Refrigerator Pickles

Categories: Homesteading, Recipes

Come on, who doesn't love pickles? So many of my favourite meals are just not right without some pickles... Like many things, homemade pickles are 100 times more delicious than the ones purchased from the store...

Most people are put off pickling as they assume they have to wait ages before they can eat the pickle. Thankfully that's not the case with this refrigerator pickle recipe from 'Savouring Time In The Kitchen'. It takes around 5-10 minutes to make, and once made it should keep in the refrigerator for 2-3 months. Check out the recipe on the link below. It also includes a printable version of the recipe too.
