The 7-Step Soil Improvement Plan

Categories: Growing your Own, Homesteading, Self-Sufficiency

In order to have a lush green lawn, a beautiful flower garden, or a productive vegetable garden, you need to have good soil, and sadly, it is getting harder and harder to find good soil.

If the topsoil in your yard hasn't been stripped by developers, it may have been neglected or abused by previous residents, or it may just never have been that good to begin with. See the 7 point The 7-Step Soil Improvement Plan below
